

## 2008 Coastal Federal Legislative Agenda

On this the 8th day of January, 2008, the **Park Board of Trustees for The City of Galveston, Texas** convened in a regularly scheduled meeting with the following members thereof present:

**Betty Massey,**  
**Michael Hightower,**  
**Ernie Connor,**  
**Vic Maceo,**  
**Sheryl Rozier,**  
**Lauraleigh Gourley-Vogel,**  
**Eddie Walsh,**  
**Danny Weber**

**Vice-Chair**  
**Secretary/Treasurer**  
**Trustee**  
**Trustee**  
**Trustee**  
**Trustee**  
**Trustee**  
**Mayor Pro Tem**

when the following proceedings, among others, were had, to-wit:

**Whereas**, America's beaches and specifically, the beaches of **Galveston Island, Texas**, are home to some of the nation's most precious natural resources. Beyond their intrinsic natural beauty, healthy beaches provide effective storm damage protection, offer residents and visitors unequaled recreational opportunities, and provide unique environmental habitats. Together with coastal wetlands, bird sanctuaries, estuaries, ports, intra-coastal waterways and other resources, our coastal regions are economic engines filled with recreational opportunities and environmental treasures that deserve to be preserved and protected. America's beaches are major tourist destinations for millions of domestic and foreign visitors, providing jobs and business profits which, in turn, produce billions of dollars in tax revenue for the federal government; and

**Whereas**, the devastation caused by hurricanes and severe weather underscores the need to invest in our nation's water resources infrastructure, including shore protection projects; and

**Whereas**, nearly 60 percent of all Americans live within 50 miles of the Atlantic and Pacific Oceans, the Gulf of Mexico, and the five Great Lakes; and it is imperative the federal government acknowledge its role and responsibility for continued support of our nation's public shores and beaches; and

**Whereas**, the past half century has demonstrated that beach nourishment works as a means of repairing erosion, storm damage protection and providing recreation while providing at least **\$4 in national economic benefits for every \$1 of federal money spent**.

**Now, Therefore, Be it Resolved** that the **Park Board of Trustees for The City of Galveston** and the **American Shore and Beach Preservation Association (ASBPA)** call upon federal legislators to help enact the **Park Board of Trustees 2008 Coastal Federal Legislative Agenda** including the following actions:

### **ASBPA and the Park Board of Trustees support the following Federal Funding Initiatives**

- **Support increased funding for studies and beach restoration projects throughout the nation** and urge the Administration to include them in its budget recommendations. If the Administration does not recommend adequate funding for these studies and projects, **Jointly the Park Board of Trustees along with ASBPA respectfully remind Congress that it is essential that priority be given to funding the periodic nourishments** to which Congress has made a statutory commitment. In addition, **ASBPA and the Park Board of Trustees urge Congress to fund new beach nourishment studies and construction starts, and permit projects to move seamlessly from study to design to construction**. ASBPA estimates the cost of providing adequate federal funding for all beach restoration projects and studies in FY 2009 to be over \$300 million, which will be matched by over \$175 million from states and localities; and,
- **Support adequate federal funding for shallow draft federal waterways**, including the nation's Intracoastal Waterway systems. These waterways are an essential part of the national waterways system, whose users provide significant tax revenues to the federal government; and,
- **Support funding for the National Shoreline Technology Demonstration Program (the "Section 227 Program") at no less than \$10 million, and the National Shoreline Management Study at no less than \$1 million**. Equally important is the need to provide at least **\$30 million for the newly-authorized National Regional Sediment Management Program**, including funding for studies that had been partially funded previously by Congress under the former Regional Sediment Management Demonstration Program; and,
- The U.S. Ocean Commission report and the President's Ocean Action Plan highlight the need to assemble and make available to the public coastal and ocean data. **ASBPA and the Park Board of Trustees urge Congress to initiate \$1 million in funding for the National Coastal Data Bank**. By appropriating \$1 million, Congress can begin a four-year effort to establish an Internet-based home for existing federal, state, and academic institution data on coastal processes; and,
- **Support increased funding for FEMA's pre-disaster mitigation program** and urge that agency to recognize the significant damage mitigation benefits derived from nourished beaches by encouraging coastal communities to restore eroded beaches; and,
- **Support the completion of the 2005 National Survey on Recreation and the Environment** being conducted by NOAA's Coastal and Ocean Resource Economics Division; and fund **\$400,000 in FY 2009** to complete the 2005 Survey and **\$20,000 to allow NOAA to share the collected economic data** with coastal states; and,

## 2008 Coastal Federal Legislative Agenda

### ASBPA and the Park Board of Trustees for the City of Galveston support the following Federal Policy Initiatives

- Support passage of a Water Resources Development Act (WRDA) in 2008 so that Congress can return to a biennial schedule of this bill that is critical for the nation's water resources infrastructure; and,
- Urge the inclusion in WRDA of language requiring the Corps of Engineers to give equal weight to the economic benefits of tourism, recreation, boating, and fishing to the region and the nation in formulating beach nourishment projects; and,
- Urge the passage of H.R. 68, which will allow for the Corps of Engineers to recommend to Congress the reauthorization of beach nourishment projects prior to the expiration of their initial 50-year period for federal fiscal involvement; and,
- Urge the Corps of Engineers to develop guidelines that enable local governments and private homeowner groups to avoid being penalized for undertaking interim erosion control activities prior to a pending federal beach nourishment project; and,
- Encourage federal initiatives to develop research in coastal engineering and science; and,
- Support the development of the **Integrated Ocean Observing System (IOOS)** and urge Congress to pass the **Ocean and Coastal Observation Systems Act (SB 950)**. Enhanced collection and analysis of coastal and ocean data will improve public policy decisions and will also help provide advance warning of hazardous conditions to potentially-affected coastal communities; and,
- Urge Congress to **reauthorize the BEACH Act by passing HR 2537 and SB 1506**, and recommend continued investment in protecting beach water quality provided that it includes additional studies of epidemiology to update or improve our understanding of appropriate pathogen; and,
- Support a multi-agency approach to assess the economic and environmental impacts of beaches and the beach nourishment process including the belief that the level of risk from coastal storms and sea level rise faced by the nation needs to be addressed by a coherent national policy, and a multi-year action plan needs to be developed in order to streamline federal efforts to address these; and
- Urge all levels of government to adopt measures to assure that all members of the public have **access to coastal resources** and to encourage development practices that are consistent with natural hazards and local conditions. **In addition, federal agencies such as FEMA and the Corps of Engineers should reward those communities that have adopted such,** and,

### ASBPA and the Park Board of Trustees for the City of Galveston support these additional Federal Initiatives

- Support the creation of a **Water Resources Coalition** to advance federal policies and funding for water resources across the nation. This partnership between leading trade associations, interest groups, corporate interests, and governmental organizations will work with Congress, the Corps of Engineers, and other federal agencies to improve the practices and policies impacting the nation's water resources, and to encourage full federal funding for the nation's water infrastructure; and,
- Support the **re-establishment of a Senate Coastal Caucus** as well as the **strengthening of the House Coastal Caucus** and the **Congressional Waterways Caucus** and will provide each with day-to-day assistance; and,
- Support the mission of the re-established **Congressional Hazards Caucus** and will participate in the activities of the Congressional Hazards Caucus Alliance, a working group formed to provide information and support to Caucus members. Additionally urge coordination and cooperation among the various congressional caucuses concerned with coastal issues and tourism; and,
- Support the efforts of the Federal Emergency Management Agency to expand property owner participation in the National Flood Insurance Program.

**Be it Further Resolved** that the **Park Board of Trustees for the City of Galveston** issues this **Resolution** supporting the **Park Board's 2008 Coastal Federal Legislative Agenda** and seeks the aid and support of its legislative delegation in the passage of these desperately needed programs; and

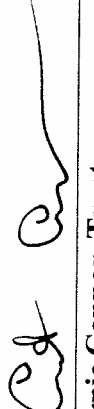

## 2008 Coastal Federal Legislative Agenda

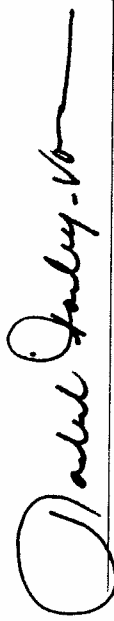

Be it Further Resolved additionally that a copy of this Resolution be spread upon the minutes of this Board and that originals hereof be furnished to Senator John Cornyn, Senator Kay Bailey Hutchinson, Congressman Nick Lampson, and Congressman Ron Paul.

Upon Motion Duly Made and Seconded, the above Resolution was unanimously passed on this 8th day of January, 2008.
